

Electronic Circular Weight Grader

From ***KW Automation***

EXCELLENCE IN WEIGHT GRADING

- **Gentlest** handling of your fruit.
- **Packing styles** include shallow bin, spring loaded or collecting hopper.
- **VDPI** tested and approved for sensitive fruit.
- **Flexibility** to handle most delicate fruit types, ie. tomato, mango, stonefruit, apples, citrus, avocado.
- **Reject** chute for smaller fruit.
- **Full** after sales support and warranty.
- **Accuracy** provided by 4 point linkage system and electronic controller.
- **Available** in 6 or 7 size configuration.
- **Easily** and quickly change weigh stations for different fruit types via controller.
- **Special** designs to suit potatoes, button squash and other vegetables and fruit.
- **Includes** 1.5m singulator and two rotating packing tables that each hold two fruit trays.
- **Options:** Extra rotating packing tables
Extra large packing tables to hold 4 fruit trays
Liner racks
Extended singulators

KW Automation circular graders now also come with the option of electronic weighing resulting in higher production speeds and highly accurate weighing.

Accuracy is provided by a unique 4 point linkage system running over a load cell that weighs each cup 100 times as it passes. The controller then activates the station you have programmed to tip the cup.

Up to six programs can be stored for different fruit types or sizes. Individual cup taring ensures accurate grading results time after time.

You can revert to mechanical weighing as a back-up to the electronic controller should it fail.
